Bella Reina Cosmetics

Cruelty Free, Vegan, and Mineral Makeup

About Us

Bella Reina products are free of synthetic fragrances, dyes, wax, talc, mineral oils and chemicals. They are highly concentrated to get results - yes it's all about the performance with the smallest footprint. The products that are used in our treatments are available to "spa-at-home". Where possible, the packaging is reusable, recyclable. In our organic products, we use only the freshest, natural and wild-crafted ingredients. In our aromatherapy, where possible, the oils are organic or hand-crafted. In our natural makeup, it's all about being cruelty-free and vegan where possible.

We love to merge products into one use, calling them "two-fers". These technologically advanced multi-functional products are quick and easy to apply, of the best quality, and never harmful to the body.

As one of the beauty industry's leading advisers, Nancy Reagan, the creator of Bella Reina, has developed loyalty throughout the United States. Known for her knowledge of skin, makeup and beauty, Nancy and her Bella Reina team include a stellar group of estheticians, nail technicians and massage therapists. While working in the beauty industry for over 20 years, Reagan knows the ongoing issues women face with beauty products. Time and simplicity of products is an ongoing goal for the Bella Reina Team.
